

Supervised Practice Experience Partnership: Assessment Overview

COLLEGE OF NURSES
OF ONTARIO
ORDRE DES INFIRMIÈRES
ET INFIRMIERS DE L'ONTARIO

THE STANDARD OF CARE.

The College of Nurses of Ontario (CNO) has developed an assessment form to support preceptors in their assessment of applicants involved in CNO's Supervised Practice Experience Partnership.

How to use the assessment form

The form is structured around key indicators from CNO's standards that nurses are accountable to demonstrate within their practice. These include scope of practice, competence, interprofessional practice, practice environment and patient-centered care.

Within each area, are broad statements that reflect nursing knowledge and skill applicants will need to demonstrate. These statements are linked to the Ontario nursing scope of practice and CNO's professional standards. Relevant standards and guidelines are listed at the end of this document.

Applicants should demonstrate an understanding of the nursing scope of practice, CNO's practice standards and the Ontario health care system. The preceptor should assess the indicators and competencies throughout the applicant's practice experience. The preceptor, in collaboration with the applicant, determines how to best complete the evaluations using the Supervised Practice Experience Assessment Form.
