Addendum to the May 2023 Council Decision Note

Proposed Registration Regulation Changes

Additional Feedback

The registrant and stakeholder consultation period ended on May 7, 2023. This addendum provides a summary of the responses that were received between April 13 and May 7.

Six additional responses (five RNs and one regulator) were received. This feedback did not substantively change the quantitative or qualitative results already shared with Council. As one example, the health professional regulator noted:

The proposed changes to the Nursing Act (1991) appear to align with the Pandemic and Emergency Preparedness Act, 2022 which included amendments to the Regulated Health Professions Act (1991). The removal of the term 'assignment' in 'emergency assignment class' aligns with language used in the Regulated Health Professions Act (1991).
